Product prices down on oil price weakness

Naphtha price slid 2% WoW to a 3-month low of US\$668/t on a decline in oil price on eased worries over an oil shortage caused by geopolitics in the Middle East. This lifted petrochemical product spread 1-4% WoW. Demand for petrochemical products remained slow on an uncertain demand outlook on fears persistently tight monetary policy around the globe and volatile oil price would lead to inventory losses. The slower recovery of demand to absorb the abundant supply leads us to take a cautious stance.

Dull market sentiment depressed average PE/PP price. Lower oil price and weak market sentiment led average PE/PP price in the past week to edge down 1% WoW to an 11-week low of US\$1,043/t. Polymer demand was dampened by prolonged high interest rates and soaring freight rate caused by the Red Sea crisis. Volatile oil price led downstream converters to shy away from building up stockpiles or holding more raw materials. *(Polymerupdate)* Lower naphtha cost drove average PE/PP spread up to an 8-month high of US\$375/t (+1% WoW), led by PP-naphtha spread (+4% WoW). Market expects PE/PP supply to tighten in the near term due to numerous maintenance turnarounds of olefins crackers in the region, including Indonesia's Chandra Asri, Malaysia's PRefChem and Thailand's PTTGC.

PX spread down WoW despite lower naphtha cost. PX-naphtha spread fell 1% WoW to US\$412/t as PX price (-1% WoW to a 2-month low) was depressed by bearish upstream MX, weaker crude oil price and bearish demand for downstream PTA on plant turnarounds in response to narrow margin. We expect PX spread to recover in late 2Q24 as higher demand for gasoline blending will eat into feedstock for PX production. Benzene spread rose 3% WoW to a 5-week high of US\$382/t vs. 12MMA of US\$281/t although demand for benzene weakened slightly on poor sentiment in downstream styrene monomer in the presence of high product availability.

Integrated PET spread stable WoW amid lower feedstock cost. PET bottle chip price slipped 1% WoW to US\$920/t on lackluster demand in the Asian market and abundant supply due to logistics bottlenecks stemming from rising freight rates and uncertain shipping schedules. *(Polymerupdate)* This led to a wider gap for integrated PET spread in Asia and Europe; spread in Asia was nearly unchanged WoW at US\$123/t (+0.3% WoW) vs. 12MMA of US\$116/t. Demand for PET bottle chips is expected to pick up as summer approaches, driven by increased production capacity in the beverage sector. *(CCFGroup)* At the same time, buyers are more price sensitive when replenishing inventory than last year due to capacity additions of PET resin in the region, largely in China.
